FINANCIAL CONSOLIDATIONS

The City of Albuquerque's operating budget appropriates monies in 36 funds divided into five types. In addition, estimated information on grant funds is provided although not appropriated. Appropriation bills for grants are introduced to Council as grants arise.

Individual funds are established for specific purposes and operate as separate entities. However, there are large numbers of financial transactions between these funds. Some transactions are arms length, such as the payment in lieu of taxes (PILOT) and indirect overhead, which the enterprise funds pay to the General Fund. Enterprises are expected to function like a private business requiring payment of taxes. In addition, central services such as purchasing, payroll, accounting, and computer access are provided by the General Fund to all other funds in the City. These costs are charged to the enterprise through indirect overhead.

City policy requires that all positions be funded in an operating fund. Thus, employees hired to do construction projects financed by General Obligation Bonds are funded in the General Fund and the capital program remits payment to the General Fund.

Transfers between funds occur for a wide variety of reasons. Funding is transferred from the appropriate operating fund to the corresponding debt service fund. A city match for grant funds is transferred from the General Fund. Transfers are recorded to cover subsidies for those funds that require subsidy from the General Fund to continue operations such as Transit and Parking. Some funds are set up to record financial transactions that are shared between two separate government bodies. This requires a transfer to appropriate the money in the General Fund as well as in the resident fund.

Total dollars involved in such transactions are quite large. Because they are appropriated in more than one fund, they are counted twice inflating the total expenses and revenues of the City. Just as the expenses are counted twice, so also are revenues, since the funds receiving the transfers treat such transfers as revenue. This overstates the City's total appropriations and revenues. There are three types of tables, (1) combined revenues by fund group, (2) combined appropriations by fund group, and (3) consolidated revenues, appropriations and fund balances.

The consolidations in the following pages prevent the distortion by eliminating interfund transactions. The first two sets of tables deal with the total city budget. The first column is the combined city total for all funds and fund groups after all eliminations. The second column shows the total amount that has been eliminated. The third column is the total as appropriated prior to eliminations.

The third set of tables cover the different fund groups. There are six fund groups in this budget. The General Fund accounts for general government functions and is supported primarily by taxes. The two special fund tables have specific revenue sources and limitations on their use. Many of these are grants from other governmental agencies. The City budget separates them based on whether it is possible to appropriate them in this document or if they must be appropriated at a later time due to timing issues with the grantor. Debt Service funds provide for the reservation of monies for the payment of interest and principal on outstanding Enterprise funds account for debt obligations. services provided and paid for by rates and user fees. Internal service funds service the City and other governmental agencies and receive all revenue from those agencies.

Individual fund tables that support these financial consolidations are located in the department budget highlights section.
